

# LED Flexible Ribbon

5050 Series – 12v Operation

<http://www.CreativeLightings.com>

## Create stunning effects with Flexible LED Ribbon lighting!

Flexible LED Ribbon lighting comes in five meter spools and is very thin and flexible compared to traditional linear lighting. They are extremely durable and energy efficient which can significantly reduce your energy and maintenance costs for many years to come.

Our Flexible LED Ribbon lighting can be used in a wide variety of applications, such as signage, channel letters, backlighting, panel edge lighting, under cabinet lighting, landscapes, fountains & water features, step and stairs, motorcycle and automotive lighting, marine and recreational vehicle, retail and display case lighting, glass art, coaches and limos, home theaters, media rooms and more!

Let your imagination be the limit of the design!
